

Your practice doesn't offer sedation yet — *one of your patients would like it to.*

This patient asked us to introduce ourselves to your practice. Sedation Solutions is a CQC-registered provider of mobile IV sedation, working across London and the Home Counties — and further afield by arrangement — since 2011. One of our sedation doctors comes to you, fully equipped, so your practice can offer sedation without changing how you work day to day.

WHAT WE BRING

- A dedicated sedation doctor, trained and CQC-registered
- All sedation drugs, monitoring and emergency equipment
- A complete clinical record for every case, sent to you the same day
- Ongoing support for you and your patient, before and after treatment

GETTING STARTED

- A quick, no-obligation conversation with our team
- A straightforward practice agreement, setting out responsibilities as required by CQC — nothing more
- We'll talk you through anything your practice needs before your first booking

There's no cost or commitment to registering — it simply means we're ready whenever you'd like to book a patient in.
